

Special Industrial R&D Alliance on ITU IMT-Advanced

The "Mission 2020" R&D Plan will bring together the world-class experts and executives from leading industries, authorities and institutions to define the future wireless and mobile technologies, set the industrial standards and business strategies, as well as advise the governments in optimizing and improving the ICT regulations towards the vision 2020. The mission is also responsible, with strong supports from investors, to deliver the next generation wireless and mobile communication systems and networks to meet the emerging communication needs of the future lifestyle of the year 2020 and beyond.

2006 7TH World Wireless Congress ®

San Francisco Bay Area, May 23-25, 2006

Since its founding in 2000, WWC has become the world's most authoritative technology summit in emerging wireless communications focusing on B3G & 4G technologies as well as industrial alliance in driving the future wireless and mobile systems platform.

-- Annual Global B3G/4G Technology Summit --

2006 World Mobile Congress ®

Munich, July 5-7, 2006

A new launch of international R&D platform in Europe to foster global scientific research and technological development in next generation wireless mobile communications with theme "Research for Mobile Lifestyle of Next Decade - A Call for Action".

-- European B3G Summit on ITU IMT-Advanced --

2006 3rd Global Mobile Congress ®

Beijing, October 9-11, 2006

Strongly supported by China central government and local governments, GMC'06 will continue to be the most authoritative and prestigious technical platform to foster the research, development and strategies in emerging C3G, B3G and 4G mobile communications. GMC's mission is to pave the way for China future mobile communication standards and technologies.

--- Driving the China Mobile Future ---

2006 4GMF Annual Conference ®

Hong Kong, December 7-9, 2006

Driving the global R&D on emerging 4G technologies, and rebuilding the mobile communication business towards the vision 2020. This annual 4GMF conference brings together the world-class pioneers on all B3G/4G critical issues – business, technology and academics.

-- Kickoff of 4G Technologies in East Asia --
